DEEPTHI V J

Dedicated Data scientist with a proven track record in designing and developing machine learning modelsto solve real-world problems. Seeking an opportunity to leverage my expertise in ML algorithms, data analysis, and programming skills to drive innovation in a dynamic organisation.

WORK EXPERIANCE

1. Ford Motors— *Data Scientist*
December 2023-August 2025

- *Worked on **Machine learning Models, Regression, Python, Alteryx, GCP, Data Analysis, Feature Engineering, ETL, Qlik Sense***

2. Philips — *ML Developer (GIG)*

January 2023 – December 2023

- Worked on Ranometer project to **forecast** RAN(Risk Analysis Number) values,
- **Synthetic data generation** for KRI(Key Risk Indicators) values
- **Analysis of risk data** using network diagrams and Machine Learning Algorithms
- Worked on **Monte Carlo Simulation** to do Risk data analysis

3. Philips — *Software engineer I*

August 2021 - December2023

- worked on **POCS**, **Support tool project** to support patient monitors in hospitals. In addition to that, I played a role in developing a **simulator** for patient monitors and implementing **test automation project**. The technologies used in this project included .NET, GRPC, WPF, WCF, Docker, and UDP
- Worked using Agile Approach

4. Philips — **Research Intern**

September 2020– August 2021

- Worked on Semantic segmentation of fetal heart view plane images **using deep learning algorithms and used dice score as evaluation matrix.**

EDUCATION

2. MTech (20**1**9 -20**2**1) — **VIT Vellore**. *Artificial Intelligence and Machine Learning*

GPA 8.4/10.00

3. BTech (20**1**4-201**8**) — **SNMIMT**. *Computer Science and Engineering*

GPA 7.2/10.00

TECHNICAL SKILLS

Machine Learning. C#, Docker, Python, Pytorch, Neural Networks, Deep Learning, GCP, Alteryx, Qlik Sense, NLP, Data structures and Algorithms, Data Science, GRPC, WPF, Clustering, Classification, Software Development, Data Visualization, Data Analysis, Image Segmentation, Object Detection, Generative AI, LLM,Prompt engineering

COURSES

- Introduction to Large language models-2024
- Introduction to responsible AI-2024
- Introduction to SQL for Bigquery and Cloud SQL -2023
- Introduction to ROS2-2021
- Neural Networks and Deep Learning Issued by Coursera-2020
- Python for Data Science and AI by IBM on Coursera-2020

PROJECTS

Semantic segmentation over fetal heart images (Internship)-
· Compared algorithms - **HRNet ,Unet3+, Resunet++, MobilenetV2, Resnet ,Unet+ + ,NNunet and got better result for NNunetfor semantic segmentation of the images.**
· Used **YOLOv3** for detecting thorax

Synthetic data generation and Organizational risk forecasting (RANOMETER) (as ML developer)
Used random forest for determining required KRI(risk indicator)s and Used Linear regression for RAN (risk analysing number) value forecasting.
· Finding Synthetic data using different models (Experimented with **GANs and different ML Models**)
· Finding relationship between data using**mutual information score , correlationmatrix**

SUPPORT TOOL
• Used to service and upgrade PHILIPSIntelliview patient monitors
• Used c#, .Net 4.8,WPF,GRPC

Background Upgrade POC
• Used to upgrade patient monitors usingspecific policies in background
• Used C# ,GRPC

Test Automation
Used to test Support tool automatically
• Used Gherkin ,SpecFlow and c#

Totel landed cost
Worked on Total landed cost prediction for supply chain USING **xgboost, python and alteryx, GCP**
PORTIA:
Worked on analysing amortisation payment done by ford to find opportunity.Used **prompt engineering** to analyse buyer remarks.

Nuts and Bolts cost Analysis
Worked on predicting Nuts and Bolts price prediction using regression .Did Feature engineering, Created

Corona Probability Prediction(Hackathon)-Using convolutional neural networks algorithm, python

Melanoma skin cancer diagnosis- Using convolutional neural networksalgorithm, python

Emotion based music player-
It plays music based on the emotion detectedusing camera. Used Convolutional neural network (CNN) and openCV library.

Urban sound classification-
Compared dilated convolutional neural network (DILATED CNN), Artificial neural network (ANN) and convolutional neural network without dilation (CNN) and comparedtheir efficiency over Urban sound data.
Got better accuracy for dilated convolutionalneural network (DILATED CNN) with dilation 2.
